Unit Levels

abs — abstract AG — army group aircraft — aircraft (e.g., airplanes, balloons, helicopters, etc.) army — army (several corps, 100,000 men) batt — battalion (a thousand men) component — a part of something comp — company (several hundred men) company — a corporation computer — a computer corps — an army corps (ca. 40,000 men) demibgd — demibrigade	disease — a biological species div — division (ca. 10-15,000 men) ftm — fireteam (a half-dozen or fewer men) ind — individual mixed — mixed, a range of sizes nation — an entire nation none — none organ — a biological entity within a living organism plane — a single airplane planes — several airplanes plat — a platoon (ca. 50 men)	plats — several platoons rgt — regiment (ca. 5000 men) ship — a single ship ships — several ships smunit — small unit sqd — squad (a dozen men) sqdm — squadron (a small group of aircraft or ships) track — a railroad track train — a railroad train unit — a unit of unspecified size veh — a vehicle
--	---	--

Force Levels

abs — abstract AG — army group army — army (several corps, 100,000 men) batt — battalion (a thousand men) comp — company (several hundred men) company — a corporation corps — an army corps (ca. 40,000 men) disease — a biological species div/divs — division (ca. 10-15,000 men)/several divisions	fleet — a large group of ships, perhaps with supporting aircraft and amphibious forces flight — approximately four aircraft ind/inds — individual/individuals industry — an entire industry internet — the InterNet/UseNet computer network natforc — national force, the entire resources of a nation or alliance plane/planes — a single airplane/several airplanes plat — a platoon (ca. 50 men)	rgt — regiment (ca. 5000 men) ship/ships — a single ship/several ships smunit — small unit species — an entire species sqdm — squadron (as of ships) smaller than a fleet, with a single mission team — a group of people unit/units — unit of unspecified size/several units vehs — several vehicles world — an entire planet
--	--	--

Locale

abs — abstract (map does not represent a geographical area) air — terrainless open sky anthill — an anthill arb — arbitrary (map represents geographic area of arbitrary extent) asteroids — one or more asteroids bay — an enclosed part of a lake or ocean bldg/bldgs — a building/several buildings btfld — a battlefield cards — the components are playing cards rather than a map [we do not index conventional collectable/complete card games] city — a city	cluster — a large group of stars cont — a continent county — a county (larger than a city, smaller than a province) field — an open field fortress — a fortress house — a house island/islands — an island/several islands kingdom — a kingdom lake — a lake locale — a place module — a module, e.g., part of a spaceship nation/nations — a complete nation/several nations	none — no map ocean — a very large body of water planet/planets — a complete planet/several planets prov — province room — a room of a building sea — open water ship — a water ship or spaceship solar — the solar system space — outer space subcont — subcontinent theater — theater of operations town — a town or similar area, perhaps rural world — a world or most of a world
---	--	---

Period

17th — events of the period 1600-1699 A.D. 18th — events of the period from 1700 A.D. up to the French Revolution anc — events of human history up to 500 A.D. contemp — events that might have taken place contemporaneous with the game's publication, such as games published in the 1970s describing a NATO invasion of Warsaw Pact countries indet — indeterminate medvl — the medieval period extends from 500 A.D. to 1600 A.D. mythic — events that could not have occurred on our time line, but involve warfare with technology of a historic period, e.g., games on German invasions of the	United States in World War II, and games played over the mapboard of mythical countries Nap — games of the Napoleonic age, from the French Revolution until 1820 A.D. perm/cre — Permian and Cretaceous: games set in these geological epochs post-45 — begins with the Japanese surrender in 1945 and arbitrarily ends in 1991 with the collapse of the Soviet Empire, but including events related to that collapse such as the wars in Chechnya, Iraq/Kuwait, and Yugoslavia SF&F — science fiction and fantasy games are set in the future and in mythical worlds	where magic works Vict — the Victorian epoch extends from 1820 until the Balkan Wars preceding World War I WW1/WW2 — World War I ends and World War II begins with the first declaration of war of World War II, namely the declaration of war on Japan by the Republic of China. The Spanish Civil War and the Italian invasion of Ethiopia are arbitrarily assigned to World War II. In some cases, notably games involving vast sweeps of history or time travel, the period is AotA — All of the above.
--	---	--

Welcome to Volume IV of *Pimper's All the World's Wargames*, covering board wargames and their immediate derivatives for the period 1990-1995. We also cover a number of board wargames of earlier periods that were not included in Volumes I to III of *Pimper's All the World's Wargames*, including a new earliest-published board wargame (*Sunk*, published in 1939), and representation of a new continent as a source of board wargames (Alif Games, publisher of *Chariot Race*, is in Tunisia.)

Readers of the hobby literature may have heard a great wailing and gnashing of teeth with references to the ongoing decline of the hobby. In the early 1990's, game publishing actually did very well. We list 72 published board wargames from 1990, 71 from 1991, 103 from 1992, 86 from 1993, 74 from 1994, and 71 from 1995, and an additional 24 from the 1990- 1995 period that we have been unable to date more precisely.

For each game, we have listed the title, publisher, unit level, force level, map scale, historical period, and date of publication. We get regular requests to list additional information. Of most interest to collectors, of course, would be the packaging type and size. Other inquirers are interested in the identity of the game's authors (designer, or designer and developer for firms using the SPI design model) or artists. Still others would like us to determine the number of errors in the rules or the balance of play. To these requests, we answer only that maintaining the current data base is at the outer limit of our resources.

Publisher

The Publisher column indicates the game's Publisher. In most cases, it has been necessary to compress the publisher's name to fit the column spacing. An alphabetical list of names appears in the table following. Some companies are known primarily by an acronym; in a few cases, the publisher's official name was once an acronym.

There are several magazines that publish board wargames. Some of these magazines, notably *Strategy & Tactics*, have had a series of publishers. For these sources, the listed publisher is the magazine by title, followed by a number indicating the issue number (or volume and issue) in the form *a* for issue or *a.b* for issue *b* of volume *a*.

Unit Level

The Unit Level column indicates the type of unit represented by a typical (or most important) type of unit counter. In some cases, assigning unit sizes is challenging. We follow the principle that a unit is identified by its size and employment. Thus, a Soviet *diviziya* is a regiment. The smallest complete combined-arms unit expected to fight independently is a division; a Roman *legio* is therefore a division. In the Napoleonic and Victorian periods, in some

cases the smallest complete combined-arms unit was larger, typically a corps. Many American Civil War period games are ambiguous and do not indicate clearly which unit type is represented by an individual unit counter. A basic American Civil War unit was a so-called *regiment* of ca. 1,000 men; we identify these as battalions, based on their size and purity of composition.

Force Level

The Force Level column indicates the scale of the total force under the control of a single player, whether an individual or a division or the entire forces of a nation or alliance. We follow the principle that the Force size is determined by the size and employment of the forces under the command of a player. A Soviet Empire *diviziya* is therefore a regiment. The smallest complete combined-arms unit expected to fight independently is a division; a Roman *legio* is therefore a division. In the Napoleonic and Victorian periods, in some cases the smallest complete combined-arms unit was larger, typically a corps. A basic American Civil War unit was a so-called regiment of ca. 1,000 men; we identify a Civil War regiment as a battalion, based on its size and purity of composition.

Locale

The Locale column indicates the area covered by the map. In many cases this is a well-defined area approximating the place where a battle was fought — the battlefield. Battlefields have changed greatly in size over the centuries. In other cases, the Locale can be specified more precisely.

Period

The period refers to the date at which the events described by the game took place.

Year

This is the year of publication, based on internal copyright dates. In some cases, a precise year of publication cannot be determined, in which case the year is indicated 199x, x being unknown. In general, copyright dates are found on unit counters, more rarely on the map or rules. In a few cases, multiple dates are found in a single game. In addition to the games published in the nominal period of this volume, we list games of earlier eras, going back to *Sunk*, published in 1939.

Footnotes

In some cases footnotes [1] provide supplemental information.
